Summary
I am a tester with bank experience. I have a great desire to work as a Manual Quality Assurance Engineer. I have a Master's degree in Computer Systems, solid theoretical knowledge in Quality Assurance, and practical experience in testing websites. Also, I have 5 years of experience completing technical tasks and performing acceptance testing. I am a fast learner, attentive to details with critical and logical thinking and teamwork skills. I am motivated to grow professionally and ready to acquire knowledge and practical skills in automated testing in the future. I read books about Python. I have been learning Pytest, Selenium, SQL in Python.

Technical skills:
- understanding of **software testing theory**
- knowledge of **test design techniques**
- understanding of **types of testing**
- understanding of **SDLC, STLC**
- knowledge of software development methodologies (**Scrum, Kanban, Waterfall**)
- experience in creating **test documentation (test case, test suite, bug report, checklist, decision table, user stories, start-transition diagram, traceability matrix**)
- bug-tracking system **Jira**
- understanding of **Client-Server architecture**
- basic knowledge of **SQL, HTML, CSS**
- basic knowledge of **Fiddler**
- basic knowledge of **API testing (Postman)**
- basic knowledge of **Selenium**
- basic knowledge of **Python**
- basic knowledge of **Git**

Experience:
10.2003 – 06.2019
Project Manager in BackOffice, PrivatBank

The main department task has been crediting social and pension payments to cards. My main task was process automation. I worked with IT departments as a customer. I generated ideas for updating systems and processes and composed technical tasks. I performed acceptance testing on middle and big tasks.
